PART C Short essay type questions

Answer any 4 out of 6 questions. Each carry 5 marks

18. Explain the outcomes of positive self-esteem [3]

-Definition of self-esteem, it nature-an individual's subjective evaluation of one's one worth. Outcomes of healthy self-esteem-positive relationships with others, increased productivity in work due to greater self-confidence, helps to maintain a positive outlook even when expectations are not met, openness to feedback and opportunities, reduced need for confirmation from others, acts as protector factor, more resilience, less likely to develop mental health issues.

19. **How can emotional intelligence be applied to enhance teamwork and collaboration? Provide two examples**. [5]

-Definition and nature of emotional intelligence, components-self-awareness, self regulation and motivation, empathy and social skills, involves perceiving emotions, understanding and managing emotions. For eg. In a workplace setting, if a team leader notices tension during a meeting and uses empathy to address concerns, fostering open dialogue and resolving conflicts amicably. Another situation can be when a team member, aware of one's own stress, communicates his workload challenges calmly, seeking support without frustration. This self-awareness encourages collaboration and helps redistribute tasks efficiently.

20. **Discuss the importance of cultural sensitivity in emotional intelligence**.- [2]

Cultural sensitivity helps to create an inclusive environment where diverse perspectives are respected and valued. Awareness of cultural differences reduces misunderstandings and promotes effective, respectful interactions. Respecting cultural norms strengthens relationships and trust among team members. Understanding cultural contexts aids in addressing conflicts constructively. Appreciating diversity fosters stronger, unified teamwork.

21. **Analyze the role of empathy in emotional maturity.**- [4]

The ability to manage emotions constructively, maintain emotional stability and respond to challenges with resilience and empathy is referred to as emotional maturity. Empathy is central to emotional maturity as it enables understanding others' feelings and perspectives. This deepens relationships, improves communication, and fosters compassion. Emotionally mature

individuals use empathy to navigate conflicts constructively, balance personal needs with others, build trust and understand emotions and interactions.

22. **Examine the impact of sleep deprivation on NREM and REM sleep and its health consequences. -[4]**

Sleep deprivation reduces both REM and NREM sleep, disrupting memory consolidation, emotional regulation, and physical restoration. NREM sleep loss impairs tissue repair and immune function, while REM sleep deprivation affects learning, mood, and creativity. Chronic deprivation increases risks of cardiovascular issues, obesity, weakened immunity, and mental health disorders like anxiety and depression. REM rebound occurs when the body compensates for REM sleep deprivation by increasing its duration and intensity in subsequent sleep cycles. REM rebound may lead to more vivid dreams or nightmares as the brain prioritizes this restorative stage. - also mention about sleep disorders

23.**Appraise different cognitive skills that can influence a person's emotional state and decision making. - [5]**

Cognitive skills like attention, memory, and problem-solving play a vital role in shaping emotional states and decision-making. Attention influences emotional focus, while memory draws on past experiences to guide responses. Problem-solving and critical thinking enable rational evaluation of choices, balancing emotions with logic. Self-regulation controls impulses, while enhancing perspective-taking and empathy, thereby reducing bias. Together, these skills help navigate complex situations effectively, promoting balanced emotions and sound decisions.

PART D Essay Type

24 Explain the application of JoHaris window and SWOT analysis in analyzing the personality dynamism. [U] [2]

Four levels of self-awareness- Blind, Hidden, Unknown and Open- features of each stage-awareness levels and personality dynamics- strength, weakness, opportunity and threat analysis of our personality

25 What is self-control? Describe the elements of self-control. [U] [3]

The ability to control your thoughts, emotions, and behaviors to achieve a goal or avoid temptation. It's a complex skill that develops over time and is part of a group of skills called executive function-deferring gratification, ability to cautious, cognitive ability, Ability to see alternative perspectives effectively

26 How do different types of social support influence emotional regulation, and what psychological mechanisms contribute to its effectiveness? Illustrate your answer with examples. [A] [1] Social support is vital for managing difficult emotions by providing emotional validation, practical assistance, and fostering resilience through various types—emotional, informational, instrumental, and companionship support. It helps reduce stress, anxiety, and depression by creating safe spaces for expression, offering guidance, and sharing enjoyable activities. Psychological mechanisms, such as reducing stress hormones, promoting emotional validation, enhancing resilience, and facilitating social learning, underpin its

effectiveness. For example, supportive relationships during life challenges, like a divorce, can alleviate emotional burdens and provide practical help. However, the quality of support and the recipient's ability to utilize it constructively are crucial for its effectiveness.
