    2 marks each for the correct explanation the three categories subject to a max of 5

    5 marks(CO2)

12. Cultural commodification refers to the process of transforming local traditions, practices,
    and cultural elements into products or experiences to be sold to tourists. This happens when aspects of a community culture—such as rituals, art, festivals, or even lifestyle—are commercialized to meet the expectations and demands of

the tourism market. While this process can generate economic benefits for local communities, it often raises
concerns about authenticity, exploitation, and the loss of cultural integrity

1. *Loss of Authenticity :* Cultural practices may be altered or simplified to make them more appealing or convenient for tourists, losing their original meaning or depth.

For *example*, traditional dances or ceremonies might be shortened or modified to fit tourist schedules or preferences.

2. *Standardization:* Diverse cultural expressions may be homogenized to cater to a wider audience, eroding regional uniqueness.

For *example*, indigenous crafts may be mass-produced using cheaper materials rather than traditional techniques.

3. *Exploitation of Culture:* Cultural elements are often used for profit without adequately benefiting the local community.

Example: The sale of artifacts made by third-party vendors, not by the community itself.

4. *Cultural Alienation:* Locals may start to see their own traditions as commodities rather
than integral parts of their identity, leading to a disconnect between the community
and its heritage.

5. *Over-tourism:* Excessive tourism can disrupt traditional ways of life, particularly in
rural or indigenous communities.

Example: Sacred rituals or religious spaces becoming overcrowded with tourists who
lack an understanding of their significance.

For correct explanation of any three (1 mark each) ----------
3 marks
For any two examples (1mark each) ----------
2marks

5 marks (CO3)

13. Tourism measurement is the process of collecting and analyzing data to assess the economic, social, and environmental impact of tourism. The effectiveness of tourism measurement in promoting tourism in India requires analyzing how well tourism data collection, analysis, and reporting systems support decision-making, policy development, and marketing strategies.
