SERIES: A **QP CODE: 24900087**

MAHATMA GANDHI UNIVERSITY, KOTTAYAM

FIRST SEMESTER MGU - UGP (HONOURS)

REGULAR EXAMINATION NOVEMBER 2024

First Semester

Multi-Disciplinary Course – MG1MDCECC100, MG1MDCECT104

CREATIVE ROBOTICS

(2024 ADMISSION ONWARDS)

Duration: 1 Hours **Maximum Marks: 35**

Remember (K), Understand (U), Apply (A), Analyse (An), Evaluate (E), Create (C), Interest (I),Appreciation (Ap), and Skill (S)

Students should attempt atleast one question from each course outcome to enhance their overall outcome attainability.

[Learning Domain][CO No(s)]

Part A

Multiple Choice Questions

Answer any 35 questions. Each question carries 1 mark

1 Identify which component is the "brain" of the Arduino board.

a) Power supply b) Voltage regulator

c) Microcontroller d) USB port Ans: C [U] [1]

2 Relate the purpose of the "Vin" pin on the Arduino board.

a) To supply 3.3V to external components b) To provide an external power source for the board

c) To interface with I2C devices d) To reset the microcontroller

Ans: B [U] [1]

3 Which port is used to upload code to the Arduino board?

a) Ethernet port b) USB port

c) Serial port d) HDMI port Ans: B [K] [1]

4 Identify the function of the RX pin on Arduino Uno.

a) To send digital data b) To receive serial data

c) To read analog signals d) To reset the microcontroller Ans: B [U] [1]

5 Relate the Arduino IDE to its primary purpose.

a) To create websites b) To compile, upload, and manage Arduino sketches

c) To monitor temperature sensors d) To control external devices

Ans: B [U] [1]

6 Identify the correct syntax to set pin 13 as an output in Arduino.

a) pinMode(13, INPUT); b) pinMode(13, OUTPUT);

c) pinMode(13,INPUT_PULLUP); d) pinMode(13, ANALOG);

Ans: B [U] [1]

7 Identify the correct syntax to set pin 3 as an output in Arduino.

a) pinMode(3, INPUT); b) pinMode(3, OUTPUT);

c) pinMode(3, INPUT_PULLUP); d) pinMode(3, ANALOG);

Ans: B [U] [1]

8 Which tool is used to write and upload code to Arduino boards?

a) Python IDE b) Arduino IDE

c) Code::Blocks d) Visual Studio Ans: B [K] [1]

9 If you connect an LED to pin 2 and use digitalWrite(2, LOW);, what would you expect to see if the LED was previously on?

a) The LED will blink b) The LED will turn off

c) The LED will turn on d) Nothing will happen Ans: B [U] [2]

10 What will the following code do? PinMode(9, OUTPUT); digitalWrite(9,LOW);

a) Pin 9 outputs 5V b) Pin 9 outputs 0V

c) Pin 9 will output 3.3V d) Pin 9 will read input voltage Ans: B [U] [2]

11 PWM in Arduino is used to simulate which type of signal?

a) LED ON and OFF b) Pure analog signal

c) Pure digital signal d) Analog signal using digital output

Ans: D [U] [2]

12 What is the range of values that can be written using the analogWrite() function?

a) 0 to 1000 b) 1 to 100

c) 0 to 10 d) 0 to 255 Ans: D [K] [2]

13 How would you calculate the output voltage of a voltage divider with resistances R1 = 10kΩ and R2 = 10kΩ, and input voltage = 12V?

a) 4V b) 6V

c) 8V d) 3V Ans: B [U] [2]

14 What voltage corresponds to a reading of 512 from analogRead() on a 5VArduino?

a) 1.25V b) 2.5V

c) 5V d) 3.3V Ans: B [U] [2]

15 How would increasing the baud rate from 9600 to 115200 affect the speed and reliability of data transmission in a noise-prone environment?

a) Speed increases but reliability decreases in noisy environments.

b) Both speed and reliability improve.

c) The speed decreases, but the transmission becomes more stable.

d) There is no impact on either speed or reliability. Ans: A [U] [2]

16 Which of the following is the correct way to print text data on the serial monitor in Arduino?

a) Serial.print("Hello"); b) Serial.display("Hello");

c) Serial.show("Hello"); d) Serial.write("Hello"); Ans: A [U] [2]

17 Which statement correctly initializes a for loop in Arduino to run 10 times?

a) for (int i = 0; i <= 11; i++) b) for (int i = 1; i <= 9; i++)

c) for (int i = 0; i < 10; i++) d) for (int i = 1; i < 9; i++)

Ans: C [U] [1]

18 "In the following code, what is the value of i when the loop terminates?

for (int i = 0; i < 4; i++)

{ // Do something}"

a) 3 b) 4

c) 5 d) 2 Ans: B [U] [1]

19 Which of the following is the correct syntax for a while loop in Arduino?

a) while i < 5 { // Do something } b) while (i < 5) { // Do something }

c) while (int i < 5) { // Do something } d) while (i > 5); { // Do something}

Ans: B [U] [1]

20 Which of the following correctly increments the loop variable i inside a while loop?

a) i + 1; b) i = i + 1;

c) i++; d) Both B and C Ans: C [U] [1]

21 What will happen if you connect an LED directly between a digital pin and ground without a resistor?

a) The LED will work fine
b) The LED will not light up
c) The LED may burn out
d) The Arduino board will stop working

Ans: C [U] [1]

22 How do you gradually increase the brightness of an LED using Arduino?

a) Use analogWrite() to adjust the duty cycle
b) Use digitalWrite() to set pin states repeatedly
c) Change the resistor value dynamically
d) Use pinMode() to adjust brightness

Ans: A [U] [1]

23 When does the code inside the setup() function run?

a) Every time the program loops
b) Only once when the Arduino board starts up or resets
c) Continuously until stopped
d) Before every loop iteration

Ans: B [U] [1]

24 How do you initialize multiple pins as outputs in a single line in Arduino?

a) pinMode(8, 9, OUTPUT);
b) pinMode(8, OUTPUT); pinMode(9, OUTPUT);
c) initialize(8, 9, OUTPUT);
d) multiPinMode(OUTPUT, 8, 9);

Ans: B [U] [1]

25 In Arduino, what default unit is the delay() function measured in?

a) Milliseconds
b) Seconds
c) Minutes
d) Microseconds

Ans: A [K] [1]

26 Which of the following is a correct syntax in Arduino programming?

a) delay(1000);
b) Delay(1000);
c) delay:1000;
d) delay;1000;

Ans: A [K] [1]

27 What is the role of 'int i = 0' in a FOR loop?

a) Declares and initializes a variable
b) Specifies the loop condition
c) Increments a variable
d) Declares a constant

Ans: A [K] [1]

28 Which of the following is true about a FOR loop in Arduino?

a) Executes a set number of times b) Can run infinitely

c) Cannot be used with delay() d) Runs only once Ans: A [U] [1]

29 What type of waves does an ultrasonic sensor emit?

a) Radio waves b) Ultrasonic waves

c) Electromagnetic waves d) Sound waves Ans: B [K] [2]

30 How is the distance calculated using the time taken by the sound wave?

a) Distance = Speed * Time b) Distance = Time / Speed

c) Distance = Speed / Time d) Distance = Time * Speed * 2

Ans: A [K] [2]

31 Which of the following can cause inaccurate readings in ultrasonic sensors?

a) Soft surfaces b) Hard surfaces

c) Distance d) Smooth surfaces Ans: C [K] [2]

32 What happens if pinMode(echoPin, OUTPUT) is used for the Echo pin?

a) It will correctly set the Echo pin b) It will cause a syntax error

c) It will generate incorrect readings d) Nothing will happen

Ans: C [K] [2]

33 Which pin on an MQ2 sensor outputs analog data?

a) D0 b) A0 c) GND d) VCC Ans: B [U] [2]

34 What precaution should be taken when using an IR flame sensor

a) Avoid using it with digital systems b) Protect it from heat exposure

c) Do not use it near visible light d) Expose it to sunlight for accurate readings

Ans: B [U] [2]

35 What does LDR stand for?

a) Light Delay Resistor b) Light Developing Resistor

c) Light Driving Resistor d) Light Dependent Resistor Ans: D [U] [2]

36 What is the function of a relay in an Arduino - LDR circuit?

a) To measure resistance b) To control high voltage devices

c) To decrease voltage d) To lower resistance Ans: B [U] [2]

37 What type of motor is used in precise control of angle?

a) DC Motor b) AC Motor

c) Servo Motor d) Stepper Motor Ans: C [U] [2]

38 How many degrees of rotation can most standard servo motors achieve?

a) 0°-90° b) 0°-180°

c) 0°-270° d) 0°-360° Ans: B [U] [2]

39 What does the L298N motor driver control?

a) Voltage b) Current

c) Speed d) Power Ans: C [U] [2]

40 What is the correct method to stop a DC motor using an L293D driver?

a) digitalWrite(pin, LOW); b) analogWrite(pin, LOW);

c) analogWrite(pin, OFF); d) motorControl(pin, STOP);

Ans:A C[U] [2]

SERIES: B **QP CODE: 24900087**

Remember (K), Understand (U), Apply (A), Analyse (An), Evaluate (E), Create (C), Interest (I), Appreciation (Ap), and Skill (S)

Students should attempt atleast one question from each course outcome to enhance their overall outcome attainability.

[Learning Domain][CO No(s)]

Part A

Multiple Choice Questions. Answer any 35 questions.
Each question carries 1 mark

1 What type of motor is used in precise control of angle?

a) AC Motor b) Servo Motor
c) Stepper Motor d) DC Motor Ans: B [U] [2]

2 Which of the following is a correct syntax in Arduino programming?

a) delay(1000); b) delay:1000;
c) delay;1000; d) Delay(1000); Ans: A [K] [1]

3 If you connect an LED to pin 2 and use digitalWrite(2, LOW);, what would you expect to see if the LED was previously on?

a) The LED will blink b) Nothing will happen
c) The LED will turn on d) The LED will turn off Ans: D [U] [2]

4 Relate the Arduino IDE to its primary purpose.

a) To control external devices b) To create websites
c) To compile, upload, and manage Arduino sketches d) To monitor temperature sensors
Ans: C [U] [1]

5 Identify the correct syntax to set pin 13 as an output in Arduino.

a) pinMode(13, ANALOG); b) pinMode(13, OUTPUT);
c) pinMode(13,INPUT_PULLUP); d) pinMode(13, INPUT); Ans: B [U] [1]

6 PWM in Arduino is used to simulate which type of signal?

a) LED ON and OFF b) Analog signal using digital output

c) Pure analog signal d) Pure digital signal Ans: B [U] [2]

7 Which of the following is the correct syntax for a while loop in Arduino?

a) while (int i < 5) { // Do something } b) while (i < 5) { // Do something }

c) while i < 5 { // Do something } d) while (i > 5); { // Do something}

Ans: B [U] [1]

8 What is the correct method to stop a DC motor using an L293D driver?

a) analogWrite(pin, OFF); b) digitalWrite(pin, LOW);

c) motorControl(pin, STOP); d) analogWrite(pin, LOW); Ans: B [U] [2]

9 What is the range of values that can be written using the analogWrite()function?

a) 0 to 255 b) 0 to 1000

c) 1 to 100 d) 0 to 10 Ans: A [K] [2]

10 What precaution should be taken when using an IR flame sensor

a) Do not use it near visible light b) Protect it from heat exposure

c) Avoid using it with digital systems d) Expose it to sunlight for accurate readings

Ans: B [U] [2]

11 Which of the following can cause inaccurate readings in ultrasonic sensors?

a) Soft surfaces b) Distance

c) Smooth surfaces d) Hard surfaces Ans: B [K] [2]

12 How is the distance calculated using the time taken by the sound wave?

a) Distance = Speed * Time b) Distance = Time * Speed * 2

c) Distance = Time / Speed d) Distance = Speed / Time

Ans: A [K] [2]

13 Which of the following correctly increments the loop variable i inside a while loop?

a) Both B and C b) i = i + 1;

c) i + 1; d) i++; Ans: D [U] [1]

14 How do you initialize multiple pins as outputs in a single line in Arduino?

a) pinMode(8, 9, OUTPUT); b) multiPinMode(OUTPUT, 8, 9);

c) pinMode(8, OUTPUT);pinMode(9, OUTPUT); d) initialize(8, 9, OUTPUT);

Ans: C [U] [1]

15 What is the function of a relay in an Arduino-LDR circuit?

a) To measure resistance b) To lower resistance

c) To control high voltage devices d) To decrease voltage Ans: C [U] [2]

16 When does the code inside the setup() function run?

a) Continuously until stopped b) Every time the program loops

c) Only once when the Arduino board starts up or resets d) Before every loop iteration

Ans: C [U] [1]

17 What is the role of 'int i = 0' in a FOR loop?

a) Increments a variable b) Declares a constant

c) Declares and initializes a variable d) Specifies the loop condition

Ans: C [K] [1]

18 Which pin on an MQ2 sensor outputs analog data?

a) VCC b) D0

c) A0 d) GND Ans: C [U] [2]

19 Which of the following is the correct way to print text data on the serial monitor in Arduino?

a) Serial.display("Hello"); b) Serial.show("Hello");

c) Serial.print("Hello"); d) Serial.write("Hello"); Ans: C [U] [2]

20 Which tool is used to write and upload code to Arduino boards?

a) Code::Blocks b) Python IDE

c) Arduino IDE d) Visual Studio Ans: C [K] [1]

21 Which port is used to upload code to the Arduino board?

a) HDMI port b) Serial port

c) Ethernet port d) USB port Ans: D [K] [1]

22 How would increasing the baud rate from 9600 to 115200 affect the speed and reliability of data transmission in a noise-prone environment?

a) There is no impact on either speed or reliability.

b) Both speed and reliability improve.

c) The speed decreases, but the transmission becomes more stable.

d) Speed increases but reliability decreases in noisy environments.

Ans: D [U] [2]

23 In Arduino, what default unit is the delay() function measured in?

a) Microseconds b) Milliseconds

c) Seconds d) Minutes Ans: B [K] [1]

24 Which of the following is true about a FOR loop in Arduino?

a) Can run infinitely b) Executes a set number of times

c) Cannot be used with delay() d) Runs only once Ans: B [U] [1]

25 What voltage corresponds to a reading of 512 from analogRead() on a 5V Arduino?

a) 3.3V b) 2.5V

c) 1.25V d) 5V Ans: B [U] [2]

26 How do you gradually increase the brightness of an LED using Arduino?

a) Use pinMode() to adjust brightness b) Change the resistor value dynamically

c) Use analogWrite() to adjust the duty cycle d) Use digitalWrite() to set pin states repeatedly

Ans: C [U] [1]

27 How many degrees of rotation can most standard servo motors achieve?

a) 0°-360° b) 0°-270°

c) 0°-90° d) 0°-180° Ans: D [U] [2]

28 Which statement correctly initializes a for loop in Arduino to run 10 times?

a) for (int i = 0; i <= 11; i++) b) for (int i = 1; i < 9; i++)

c) for (int i = 1; i <= 9; i++) d) for (int i = 0; i < 10; i++) Ans: D [U] [1]

29 "In the following code, what is the value of i when the loop terminates?

for (int i = 0; i < 4; i++) { // Do something }"

a) 4 b) 2

c) 3 d) 5 Ans: A [U] [1]

30 How would you calculate the output voltage of a voltage divider with resistances R1 = 10kΩ and R2 = 10kΩ, and input voltage = 12V?

a) 3V b) 6V

c) 4V d) 8V Ans: B [U] [2]

31 Identify which component is the "brain" of the Arduino board.

a) Power supply b) Voltage regulator

c) Microcontroller d) USB port Ans: C [U] [1]

32 Identify the correct syntax to set pin 3 as an output in Arduino.

a) pinMode(3, INPUT_PULLUP); b) pinMode(3, INPUT);

c) pinMode(3, OUTPUT); d) pinMode(3, ANALOG);

Ans: C [U] [1]

33 What type of waves does an ultrasonic sensor emit?

a) Sound waves b) Ultrasonic waves

c) Radio waves d) Electromagnetic waves Ans: B [K] [2]

34 Relate the purpose of the "Vin" pin on the Arduino board.

a) To interface with I2C devices b) To reset the microcontroller

c) To provide an external power source for the board

d) To supply 3.3V to external components Ans: C [U] [1]

35 What will the following code do? PinMode(9, OUTPUT); digitalWrite(9,LOW);

a) Pin 9 outputs 5V b) Pin 9 will read input voltage

c) Pin 9 will output 3.3V d) Pin 9 outputs 0V Ans: D [U] [2]

36 What does the L298N motor driver control?

a) Current b) Voltage

c) Speed d) Power Ans: C [U] [2]

37 What does LDR stand for?

a) Light Driving Resistor b) Light Dependent Resistor

c) Light Delay Resistor d) Light Developing Resistor Ans: B [U] [2]

38 Identify the function of the RX pin on Arduino Uno.

a) To read analog signals b) To receive serial data

c) To reset the microcontroller d) To send digital data Ans: B [U] [1]

39 What will happen if you connect an LED directly between a digital pin and ground without a resistor?

a) The LED will not light up b) The LED will work fine

c) The Arduino board will stop working d) The LED may burn out Ans: D [U] [1]

40 What happens if pinMode(echoPin, OUTPUT) is used for the Echo pin?

a) It will generate incorrect readings b) Nothing will happen

c) It will correctly set the Echo pin d) It will cause a syntax error

Ans: A [K] [2]
