Name : .....

MAHATMA GANDHI UNIVERSITY, KOTTAYAM

MGU-UGP (HONOURS) REGULAR EXAMINATION March 2026

Fourth SEMESTER

Discipline Specific Core Course (DSC) - MG4DSCCMA201 - DIGITAL TOOLS FOR BUSINESS AND RESEARCH

(2024 ADMISSION ONWARDS)

Duration: 1 hour 30 minutes **Maximum Marks: 50**

Remember(K), Understand(U), Apply(A), Analyse(An), Evaluate(E), Create(C), Skill(S), Interest(I) and Appreciation(Ap)

Students should attempt at least one question from each course outcome to enhance their overall outcome attainability.

Part A

Very Short Answer Questions

Answer all questions

Each question carries **2** marks

1. Explain why the interpretation of results is important in data analysis. (Write any two points). [U] / [CO1]
2. How does data support decision making? [U] / [CO1]
3. Define describing data numerically. Give two examples of numerical summary measures. [K] / [CO2]
4. Name the different types of ANOVA. [K] / [CO3]
5. State the main difference between ANOVA and Kruskal-Wallis test. [U] / [CO3]

[2x5 = 10]

Part B

Short Answer Questions

Answer any **5** questions

Each question carries **5** marks

6. Explain how information supports decision making in business organizations. [U] / [CO1]

7. Explain how the SPSS/PSPP interface supports data analysis workflow. [U] / [CO1]

8. Explain the purpose of a line chart and a bar chart. How do they differ in the type of data they represent? [K] / [CO2]

9. Compare Recoding and Visual Binning methods in SPSS. Explain when each method should be used. [U] / [CO2]

10. Illustrate with an example how regression is applied for prediction. [A] / [CO3]

11. Discuss the procedure for undertaking correlations. [U] / [CO3]

12. Interpret a Two-Way ANOVA output to identify main effects. [A] / [CO3]

[5x5 = 25]

Part C

Essay Questions

Answer any **1** questions

Each question carries **15** marks

13. Explain skewness and kurtosis. Explain how these measures describe the shape of a distribution. Discuss Positive and negative skewness. How these measures support interpretation of data. [U] / [CO2]

14. Describe null hypothesis, alternate hypothesis, significance level and p-value in respect of paired-sample t-test. [U] / [CO3]

[15x1 = 15]
