**25901208**

**MAHATMA GANDHI UNIVERSITY, KOTTAYAM**

**MGU-UGP (HONOURS) REGULAR EXAMINATION March 2026**

**Fourth SEMESTER**

**Value Addition Course (VAC) - MG4VACCFS200 –**

**CYBER LAWS AND CASE STUDIES**

**(2024 ADMISSION ONWARDS)**

**Duration: 1 hour 30 minutes.** **Maximum Marks: 50**

**Part A**

**Short Answer Type Questions**

**Answer any 10 questions**

**Each question carries 1 marks**

**1.** One source of Indian law

The Constitution of India is one of the main sources of Indian law.

**2.** Significance of non-repudiation in digital transactions

Non-repudiation ensures that a party cannot deny sending or receiving a digital transaction, increasing trust and legal validity.

**3**. IT Act section for legal recognition of electronic records

Section 4 of the Information Technology Act, 2000 gives legal recognition to electronic records.

**4.** Cyber crime enforcement system

India's cyber crime enforcement includes:

Cyber Police Stations

Indian Cyber Crime Coordination Centre (I4C)

CERT-In

State cyber cells

**5**. Objectives of IT Act, 2000

- Legal recognition of electronic records and signatures
- Promotion of e-governance
- Prevention of cyber crimes
- Facilitation of electronic commerce

**6**. Electronic contracts in e-commerce

- Electronic contracts are applied through:
- Online agreements (click-wrap/shrink-wrap)
- Digital signatures
- Automated contract formation in e-commerce platforms

**7.** Agency protecting critical infrastructure

NCIIPC (National Critical Information Infrastructure Protection Centre)

**8.** Need for regulation of personal data

To:

- Protect privacy of individuals
- Prevent misuse of personal information
- Ensure data security
- Build trust in digital systems

**9**. Jurisdiction in online contracts

Courts consider:

- Place of contract formation
- Location of parties
- Server location
- Where damage/effects occur (effects doctrine)

**10**. Verification procedures of Certifying Authorities

- Identity verification of applicant
- KYC documentation
- Validation of public key pair
- Issuance of Digital Signature Certificate (DSC)

**11.** IT Act section for validity of electronic contracts

Section 10A of IT Act, 2000

**12.** Types of e-commerce models

- B2B (Business to Business)
- B2C (Business to Consumer)
- C2C (Consumer to Consumer)
- C2B (Consumer to Business)
- B2G (Business to Government)

**Part B**
**Short Essay Type Questions**
**Answer any 4 questions**
**Each question carries 5 marks**

**13**. Role of Cyber Laws in controlling digital activities

Cyber laws regulate digital behavior by:

- Defining cyber crimes and punishments
- Protecting data and privacy
- Regulating e-commerce transactions
- Ensuring safe online communication
- Supporting cyber security enforcement agencies

They help maintain order, security, and trust in cyberspace.

**14.** Adjudication process under IT Act

- Appointment of Adjudicating Officer
- Inquiry into cyber offence or negligence
- Giving opportunity to both parties
- Determining compensation/penalty
- Orders passed based on evidence

Appeal lies to Cyber Appellate Tribunal (now TDSAT).

**15.** Yahoo data breach

The Yahoo breach (2013–2014) affected over 3 billion accounts.

- Stolen data: emails, passwords, personal details
- Caused by unauthorized access and hacking
- Considered largest breach due to scale
- Resulted in lawsuits and reduced trust in Yahoo

**16.** Lessons from high-profile cyber crime cases

- Strong encryption is essential
- Regular security audits are needed
- Employee awareness reduces risks
- Companies must detect breaches early
- Strict data protection laws are necessary

**17.** Traditional jurisprudence vs cyber jurisprudence

**Traditional Jurisprudence**

Physical laws

Location-based jurisdiction

Physical evidence

Electronic evidence

**Cyber Jurisprudence**

Digital laws

Borderless jurisdiction

Electronic evidence

Faster evolving laws

Cyber crimes

**18.** Amazon and counterfeit seller dispute

- Issue: Sale of counterfeit goods by third-party sellers
- Amazon faced criticism for lack of control
- Resolution:
  - Introduction of Brand Registry
  - Strict seller verification
  - AI-based counterfeit detection

Improved protection for genuine sellers and buyers

## Part C

## Essay Type Questions

**Answer any 2 questions**

**Each question carries 10 marks**

**19.** 10 types of notifiable cyber incidents to CERT-In

CERT-In mandates reporting of:

1. Targeted scanning/probing of networks
2. Compromise of critical systems
3. Unauthorized access to IT systems
4. Defacement of websites
5. Malicious code attacks (virus, trojan, worms)
6. Identity theft or spoofing
7. Phishing attacks
8. Ransomware incidents
9. Data breach/leakage
10. DDoS (Distributed Denial of Service) attacks

These help CERT-In respond quickly to threats and protect national cyber security.

**20.** E-Governance and electronic records under IT Act

E-Governance provisions

- Section 6: Electronic filing of documents with government
- Section 7: Retention of electronic records
- Section 8: Publication in electronic form
- Section 9: No right to insist on paper format

Examples

- Online income tax filing
- Passport Seva portal
- DigiLocker services
- GST portal

**Importance**

- Faster service delivery
- Reduced paperwork
- Transparency in administration
- Cost efficiency

**21.** Impact of modern technologies on privacy rights

**Social Media**

- Excess data sharing
- Tracking user behavior
- Risk of identity theft

**Artificial Intelligence**

- Facial recognition surveillance
- Data profiling without consent
- Algorithmic bias affecting privacy

**Cloud Computing**

- Data stored on remote servers
- Risk of data breaches
- Dependency on third-party providers

**Overall impact**

- Privacy becomes harder to protect
- Need for strong laws like Digital Personal Data Protection Act
- Users must be aware of digital footprints
