Name : .....

MAHATMA GANDHI UNIVERSITY, KOTTAYAM

MGU-UGP (HONOURS) REGULAR EXAMINATION March 2026

Fourth SEMESTER

Discipline Specific Core Course (DSC) - MG4DSCFSQ200 - SENSORY SCIENCE

(2024 ADMISSION ONWARDS)

Duration: 1 hour 30 minutes **Maximum Marks: 50**

Remember(K), Understand(U), Apply(A), Analyse(An), Evaluate(E), Create(C), Skill(S), Interest(I) and Appreciation(Ap)

Students should attempt at least one question from each course outcome to enhance their overall outcome attainability.

Part A

MCQ

Answer all questions

Each question carries **1** marks

1. Label the test that measures force, stress, and strain. [K] / [CO1]

   a). Empirical b). Imitative

   c). Fundamental d). Sensory

2. Indicate why sample containers should be odour-free in sensory tests. [U] / [CO2]

   a). Texture masking b). Flavour contamination

   c). Temperature fluctuation d). Visual bias

3. Recognize the principle that ensures comparability between samples. [K] / [CO1]

   a). Random serving order b). Chemical standardization

   c). Nutritional equivalence d). Instrument calibration

4. Select the characteristic flavor note of ripe fruits: [K] / [CO1]

   a). Bitter b). Sweet and aromatic

c). Metallic d). Pungent

5. Recall what the panelist is asked to do in a descriptive test. [U] / [CO3]

a). Give liking score b). Identify odd sample

c). Rank samples d). Describe intensity of each attribute

6. Select the statement that best distinguishes sensory evaluation from instrumental analysis. [K] / [CO1]

a). Sensory evaluation measures nutrients b). Sensory evaluation depends on human perception

c). Sensory evaluation uses calibrated equipment d). Sensory evaluation excludes subjective response

7. Preference tests mainly measure [K] / [CO3]

a). Product quality b). Attribute intensity

c). Consumer choice d). Threshold sensitivity

8. The sensor array in E-nose consist of [K] / [CO1]

a). One sensor b). Two sensor

c). Multiple sensor d). No sensor

9. State the most suitable temperature range for sensory evaluation rooms. [U] / [CO2]

a). Below 15 °C b). 25–30 °C

c). 35–40 °C d). 18–22 °C

10. Name the component that stores and displays analyzed data [K] / [CO1]

a). Sensor array b). Computer system

c). Reference electrode d). Sample chamber

[1x10 = 10]

Part B

Short Answer

Answer any **4** questions

Each question carries **5** marks

11. Outline the steps involved in the mechanism of taste perception. [K] / [CO1]

12. Define orthonasal smelling. Describe its role in odour perception [K] / [CO1]

13. Define odor and flavour.Explain their importance in food acceptance and consumer preference. [K] / [CO1]

14. Discuss on mean and median with suitable examples [U] / [CO3]

15. Describe factors influencing visual perception of food. [K] / [CO1]

16. Identify the components included in a sensory evaluation scorecard. [U] / [CO2]

[5x4 = 20]

Part C

Essay

Answer any **2** questions

Each question carries **10** marks

17. List and describe the five basic tastes. [K] / [CO1]

18. Identify the seven types of rating tests used in sensory evaluation and explain any four. [U] / [CO3]

19. Explain the importance of texture in processed foods. [K] / [CO1]

20. Discuss the steps involved in recruiting sensory panel members for a laboratory. [U] / [CO2]

[10x2 = 20]
