MAHATMA GANDHI UNIVERSITY, KOTTAYAM

MGU-UGP (HONOURS) REGULAR EXAMINATION March 2026

Fourth SEMESTER

Skill Enhancement Course (SEC) - MG4SECFSQ201 - FIRST-AID, FIRE SAFETY AND DISASTER MANAGEMENT

(2024 ADMISSION ONWARDS)

Duration: 1 hour 30 minutes **Maximum Marks: 50**

Remember(K), Understand(U), Apply(A), Analyse(An), Evaluate(E), Create(C), Skill(S), Interest(I) and Appreciation(Ap)

Students should attempt at least one question from each course outcome to enhance their overall outcome attainability.

Part A

MCQ

Answer all questions

Each question carries **1** marks

1. Identify an example of community capacity in disaster management. [K] / [CO1]

   a). Lack of awareness b). Local disaster management committees

   c). High population density d). Unsafe housing structures

2. Recall which fund is used for meeting emergency response, relief and rehabilitation at the national level. [K] / [CO1]

   a). National Disaster Response Fund b). National Disaster Mitigation Fund

   c). State Disaster Response Fund d). District Disaster Mitigation Fund

3. Define the term hazard. [K] / [CO1]

   a). Improve community coping ability b). Physical phenomenon posing threat to life and property

   c). Reduce disaster impact d). Increase preparedness only

4. Recognize the main focus of the response plan in a VDMP. [K] / [CO1]

a). Long-term development b). Time-sensitive actions to save life and property

c). Policy formulation d). Economic planning

5. Recognize the correct relationship between hazard, vulnerability and disaster. [K] / [CO1]

a). Hazard + capacity = disaster b). Hazard × vulnerability = disaster

c). Hazard ÷ vulnerability = disaster d). Capacity × hazard = disaster

6. Select the body that assists the NDMA in the implementation of its policies and plans. [U] / [CO1]

a). National Institute of Disaster Management b). National Disaster Response Force

c). National Executive Committee d). State Executive Committee

7. Recall which of the following is NOT a component of disaster management as per the DM Act 2005. [K] / [CO1]

a). Mitigation b). Preparedness

c). Capacity building d). Agricultural development

8. Identify the correct action to take if blood soaks through the initial sterile dressing. [U] / [CO2]

a). Remove the soaked dressing b). Apply further dressing over the initial one

c). Wash the wound d). Stop applying pressure

9. Identify the duration chest pain usually lasts before being considered a major warning sign. [K] / [CO2]

a). Less than 1 minute b). 3 to 5 minutes or more

c). Exactly 10 seconds d). Only when bending

10. List a common source of exposure to biological hazards. [K] / [CO2]

a). All human body fluids and secretions b). Clean bandages and dressings

c). Intact skin of the first aider d). Air in the community center

11. Identify an example of a fracture caused by "indirect force." [U] / [CO2]

a). A bullet injury b). A wheel passing over a bone

c). A collarbone break from falling on an outstretched hand d). A fall on a projecting stone

12. Give the purpose of managing "Shock" as part of first aid treatment. [U] / [CO2]

a). To stop all bleeding immediately
b). To prevent death even if the injury itself isn't fatal
c). To clean contaminated wounds
d). To help the victim fall asleep

13. Identify the most important immediate action to take if a stroke is suspected. [U] / [CO2]

a). Drive them to a clinic
b). Call emergency services
c). Give them water
d). Let them sleep

14. Identify the two types of airway obstruction. [K] / [CO2]

a). Mild and Severe
b). Partial and Complete
c). Internal and External
d). Acute and Chronic

15. Define the primary use of a first aid box. [K] / [CO2]

a). To perform advanced surgical procedures
b). To provide quick, effective solutions for immediate treatment and stabilization
c). To replace the need for professional doctors permanently
d). To store long-term prescription medications

16. The first step in fire protection of a building is: [U] / [CO3]

a). Fire extinguisher
b). Fire detection
c). Fire evacuation
d). Fire reporting

17. Identify the fourth element that is added to a fire triangle, which makes it to a fire tetrahedron. [K] / [CO3]

a). Oxygen
b). Chemical reaction
c). Heat
d). Fuel

18. Identify the extinguishing medium used in a water type extinguisher. [K] / [CO3]

a). Foam concentrate
b). Carbon dioxide
c). Dry chemical powder
d). Water

19. Give the main purpose of a Fire Department NOC for buildings. [K] / [CO3]

a). To approve building design aesthetics
b). To ensure tax compliance

c). To verify fire resistance and safety measures

d). To approve electrical layout

20. Rate-of-rise temperature sensors are activated when temperature increases at approximately: [K] / [CO3]

a). 1–5°F per minute

b). 5–10°F per minute

c). 15–20°F per minute

d). 25–30°F per minute

[1x20 = 20]

Part B

Short Answer

Answer any **5** questions

Each question carries **4** marks

21. Define mitigation and explain why it is considered the cornerstone of disaster management. [K] / [CO1]

22. Summarize the importance of community awareness and education programs in risk reduction. [U] / [CO1]

23. Give the signals of a possibly venomous snakebite. [K] / [CO2]

24. Explain why a rescuer should allow for complete "chest recoil" after each compression and why a firm surface is necessary for infants. [U] / [CO2]

25. Discuss how a fire extinguisher works to stop a fire. [K] / [CO3]

26. List any five common applications or places where fire blankets are used. [K] / [CO3]

27. List and explain any five important maintenance requirements of fire sprinkler systems. [K] / [CO3]

[4x5 = 20]

Part C

Essay

Answer any **1** questions

Each question carries **10** marks

28. Write an essay on first aid measures for poisoning and drowning. [U] / [CO2]

29. Differentiate between Intentional and Unintentional fire. Give examples. [U] / [CO3]

[10x1 = 10]
