MAHATMA GANDHI UNIVERSITY, KOTTAYAM

MGU-UGP (HONOURS) REGULAR EXAMINATION March 2026

Fourth SEMESTER - MG4DSCHMC201 – FOOD & BEVERAGE SERVICE OPERATIONS - II

PART -A

1. **Two herb-based liqueurs:**
   - Chartreuse
   - Benedictine
2. **Pot still distillation:**
   A traditional batch distillation method using a pot-shaped still to produce spirits with rich flavor and character.
3. **Two famous liqueur brands:**
   - Baileys
   - Cointreau
4. **Proof system:**
   A method to measure alcohol strength in spirits (e.g., 100 proof = 50% alcohol by volume in many systems).
5. **Micro-organism used in fermentation:**
   - Yeast (Saccharomyces cerevisiae)
6. **Main Scotch whisky regions:**
   - 5 regions (Highlands, Lowlands, Speyside, Islay, Campbeltown)
7. **Main raw material for rum:**
   - Sugarcane (molasses or sugarcane juice)
8. **Cask used for ageing American whisky:**
   - New charred oak barrels
9. **Blanco tequila:**
   - Unaged or minimally aged tequila, clear in color.
10. **Country that made gin popular:**

- England

11. **When cigars are usually served:**

- After meals (post-dinner)

12. **Irregular cigar shape:**

- Figurado

13. **Why tobacco is addictive:**

- Due to nicotine, which creates dependency.

14. **Curing in cigarette manufacturing:**

- Process of drying and aging tobacco leaves to develop flavor and reduce moisture.

15. **Effect of tobacco on oral health:**

- Causes gum disease, tooth discoloration, and oral cancer.

PART -B

16. **Advantage of patent still over pot still:**

- Continuous operation, higher efficiency, produces large quantities, more economical.

17. **Alcoholic beverages – Definition & classification:**
    Definition: Drinks containing ethyl alcohol produced by fermentation or distillation.
    Classification:

- Fermented: Beer, wine
- Distilled: Whisky, rum, vodka
- Liqueurs: Flavored and sweetened spirits

18. **Plum brandy from Eastern Europe:**

- Slivovitz (Slivovica)

19. **Cognac:**
    A type of brandy produced in the Cognac region of France from grapes and aged in oak barrels.
20. **Tobacco plant:**

- Nicotiana tabacum

21. **Cigar filler:**
    The inner tobacco leaves that form the bulk of the cigar and determine its strength and flavor.

PART -C

22. History and development of alcoholic beverages:

- Originated in ancient civilizations (Mesopotamia, Egypt)
- Early drinks: beer and wine through natural fermentation
- Distillation developed in the Middle Ages
- Expansion during colonial trade (rum, whisky)
- Industrial revolution improved production
- Modern era: quality control, branding, global consumption

23. Characteristics of Irish whisky:

- Triple distilled (smoother taste)
- Made from malted and unmalted barley
- Light, smooth, less smoky than Scotch
- Aged minimum 3 years in wooden casks
- No strong peat flavor

24. Ideal storage conditions for cigars:

- Temperature: 18–21°C
- Humidity: 65–70%
- Stored in a humidor
- Avoid direct sunlight
- Proper air circulation
- Keep away from strong odors
- Store horizontally
- Regular monitoring of humidity levels
